SOLAR APPROACH LIGHTING SYSTEM

Carmanah's flexible, solar-powered Approach Lighting System (ALS) provides visual information on runway alignment, height perception, roll guidance and horizontal references:

- FAA, ICAO and UFC photometric compliant
- Ideal for permanent, temporary, emergency and military airfields
- Easy to install, configure and maintain

When landing aircraft, an ALS is critical during the transition from instrument flight (IFR) to visual flight (VFR). Our ALS features:

- Advanced LED optics with no high voltage cables or bulb changes
- Designed for portable or fixed applications
- Visible and optional Infrared (IR) operating modes
- Optional wireless control provides on-demand operation from up to 4 km (2.5 m) away
- Optional control tower intergration and ARCAL
- Solar, AC or battery powered options

Our ALS is compliant with international standards for approach lighting systems and accommodates a wide variety of layouts including:

- ICAO Simple ALS
- FAA Medium Intensity Approach Lighting (MALSR)
