

Low Profile Glass Solar Road Markers

Embedded toughened glass Solar Road Markers are a high impact, trafficable, self-contained, rechargeable, LED illuminated marker. Visible up to 1000 metres they are used to reduce speed or signal driver attention to hazards and dangerous bends on our roads. Commonly used on sharp corners, roundabouts, traffic islands and delineations. The toughened glass models are rated to 20 tons and offer 360° visibility in static or flashing modes providing clear and visible traffic guidance in all weather conditions. Multiple colour options are available. These units require no maintenance and generate no ongoing operational costs.

Luminaire Height	25mm
Lumen Output	48 lm
LED Output	0.2W

FEATURES

Road embedded, high impact, trafficable

Visible over 1000 metres

360° visibility
