

The solar powered wall washer is designed to highlight stairs, decks and walkways or features in the garden. It can also be installed above or below a sign to illuminate it effectively and efficiently without the need for cabling or trenching. This commercial grade fixture is available in two models: 517mm 200lm and 1022mm 400lm. The light source is from either 10 or 20 high powered 6500k LEDs. The combination of the 4w, 5.5v solar panel and the 3.7v 4400mah Li-ion battery enable the Wall Washer to illuminate for 5 hours at full output and 3 hours at half output each night. The wall washer can be surface mounted at either ground level or on a wall.
